EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Reasons for Examiner's Amendment

In the Abstract, language from allowed claim 1 has been incorporated (verbatim) to more accurately reflect the allowed claims.

3. The application has been amended as follows:

In the Abstract, lines 8-15 have been replaced in their entirety by the following:

-- wherein the polyester film is stretched at a ratio of about 2.5X to 3X in the machine direction (MD) and about 2.5X to 3X in the transverse direction (TD) at stretching temperatures between 90 and 110°C, wherein the stretched film is subsequently heat-set at an actual film temperature of from 260°C to T_m , wherein T_m is the melting point of the polyester as measured by differential scanning calorimetry (DSC), while maintaining the dimensions of the stretched film, and wherein the biaxially oriented and heat-set polyester film undergoes not more than 3% shrinkage when immersed for 10 seconds in a solder bath preheated to 260°C and exhibits a coefficient of thermal expansion value of 10-85 ppm/°C when measured between 120 and 150°C, and a coefficient of thermal expansion value of 10-42 ppm/°C when measured between 25 and 90°C. --

Art Unit: 1773

4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or suggest the recited biaxially oriented film formed from the recited 1,4-cyclohexanedimethanol-based (co)polyester, said film having the recited combination of shrinkage and thermal expansion values (claim 1); or laminates containing said film and thermally curable adhesive layers (claim 63); or flexible circuit boards containing said film (claim 70). WO '96/06125 fails to disclose the recited thermal expansion values in conjunction with the specified shrinkage characteristics at 260°C.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
